

Kotlin

Kotlin

Description: Kotlin is an object-oriented language which also has a lot of functional programming elements. From the object-oriented side, it supports nominal subtyping with bounded parametric polymorphism (akin to generics) and mixed-site variance. From the functional programming side, it has first-class support for higher-order functions and lambda literals.

Course ID:8

Course Duration: 35 Hours

Total Module: 20

Price: BDT8000
